Countries

One solution

Acumatica
The Cloud ERP

LYNQ

Source: IEC62264-3 Generic activity model of manufacturing operations management

One product. All the features.

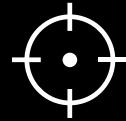

Plan

Effective scheduling of resources with online plans and interactive job lists.

Core features

Resource management
Detailed scheduling
Materials planning
Finite capacity planning
Online production plans
Interactive job lists

Track

Real-time data collection and tracking of employees, equipment and jobs.

Core features

Configurable terminals
Job management
Materials management
Time and attendance
Real-time tracking
Performance monitoring
Supervisory control

Automate

Automatic data capture from machines and other devices.

Core features

Machine connectivity
Automatic data collection
Human machine interface
Data management

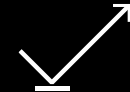

Analyse

World-class factory performance analysis with loss visualisation.

Core features

Factory performance
Employee performance
Equipment performance
Product analysis
Loss visualisation

Optimise

Paperless shop floor with downtime alerts and collaborative messaging.

Core features

Instant messaging
Configurable alerts
Issue management
Paperless shop

Acumatica Materials

- Integration Video (3 min)
- Integration Whitepaper

PLUG AND PLAY
INTEGRATION

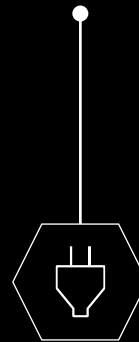

Certified integration
with **Acumatica 2020 R2**

LYNQ

MACHINE
CONNECTIVITY

Over **140 industrial
drivers** to the most
common PLC-I/O devices

THIRD PARTY
PLUGINS

Microsoft Power Platform,
Payroll, WMS, QMS, SPC,
SQC, SCADA, CMMS
