

PRESS RELEASE – 31st AUGUST 2021 – ANG OFFICIALLY PARTNERS WITH LYNQ

ANG has officially become a Gold LYNQ MES partner and is the exclusive partner for SAP Business One in the DACH region.

LYNQ MES extends ANG's portfolio of solutions in order to provide comprehensive manufacturing functionality to digitalise and drive factory performance. LYNQ's MES (Manufacturing Execution System) integrates with SAP Business One with visual planning and scheduling as well as comprehensive manual and automatic data collection and analysis from employees and machines. This enables manufacturing companies to maximize efficiency, productivity and profitability, advancing digital transformation throughout the entire manufacturing process.

ANG chose to partner with LYNQ in order to be able to expand their solution offering to manufacturing companies, meet customer needs more purposefully and access new target markets.

“We are delighted to be partnering with LYNQ as their MES solution has impressive ROI figures from a single integrated planning and production system, that meets the needs of our manufacturing customers.” Helmut Houdek, Director of Sales, ANG GmbH. “We were impressed by LYNQ's ability to make the best possible use of employees and machines by moving beyond basic scheduling. LYNQ supports this through intelligent tracking, monitoring and analysis of shop-floor data. Production plans in the MES are controlled in detail to the hour and minute, with real time data on the availability of resources and production statuses.”

About ANG

ANG specialise in SAP Business One, tailoring standard ERP solutions specifically to the needs of their customers. They are a highly experienced partner delivering state-of-the-art business management solutions that optimise business processes. ANG is trusted by more than 350 customers in 15 countries with offices in Austria, Switzerland and Germany.

About LYNQ

LYNQ is reinventing manufacturing execution system (MES) software. Configurable, intelligent and quick to deploy, LYNQ helps manufacturers around the world thrive in today's competitive market. LYNQ technology drives continuous improvement with plug and play manufacturing operations management software, that is easy to work with and enjoyable to use. Designed, developed and deployed to a high standard for a fraction of the typical cost, LYNQ MES accelerates digital transformation and automation initiatives to achieve delivery, quality and financial goals.
