

PRESS RELEASE – 27th AUGUST 2021 – ALGORITHM OFFICIALLY PARTNERS WITH LYNQ

Algorithm has officially become a Silver LYNQ MES partner, based in Dublin, Ohio.

LYNQ MES extends Algorithm’s portfolio of solutions in order to provide comprehensive manufacturing functionality to digitalise and drive factory performance. LYNQ’s MES (Manufacturing Execution System) integrates with Acumatica to provide visual planning and scheduling as well as comprehensive manual and automatic data collection and analysis from employees and machines. This enables manufacturing companies to maximize efficiency, productivity and profitability, advancing digital transformation throughout the entire manufacturing process.

Algorithm’s number one priority is to provide solutions that deliver customer success. They had identified a gap in their portfolio for a manufacturing solution for Acumatica that could provide visual scheduling as well as advanced capacity planning and resource management. This is when they found LYNQ, capable of offering all of the above functionality in one plug and play solution that can be live in as little as 12 weeks.

“We have worked with LYNQ for many years with our Macola customers and find them to be a great compliment to our multitude of solutions servicing the manufacturing industry. Now we’re happy to formalize the agreement and extend their advanced functionality to our Acumatica customers. Their MES solution fills a much-needed gap, and we couldn’t be more thankful to partner with them,” said, Michael Oswalt, President and Owner of Algorithm Inc.

“We are very excited to have Algorithm certified as a LYNQ silver partner, their expertise in the Acumatica space and high-levels of customer service make them a perfect fit for our partner programme. With offices in Dublin, Ohio, Algorithm extends LYNQ global reach throughout North America. LYNQ provides an ideal solution for manufacturing companies using Acumatica to extend the solutions planning, data collection and analytical functionality.” Mark Gregory, LYNQ CEO.

About Algorithm, Inc.

Algorithm have been in the ERP space for 25 plus years with a combined knowledge of over 400 years across ERP and business solutions. Their knowledge grew exponentially from Macola integrations to a mastery of Acumatica’s software. Algorithm, Inc. is an Acumatica Cloud ERP Gold Certified Partner and delivers networking, warehouse management, corporate performance management, and custom development solutions.

About LYNQ

LYNQ is reinventing manufacturing execution system (MES) software. Configurable, intelligent and quick to deploy, LYNQ helps manufacturers around the world thrive in today’s competitive market. LYNQ technology drives continuous improvement with plug and play manufacturing operations management software, that is easy to work with and enjoyable to use. Designed, developed and deployed to a high standard for a fraction of the typical cost, LYNQ MES accelerates digital transformation and automation initiatives to achieve delivery, quality and financial goals.
